nav KULKARI

DATA & ML ENGINEERING LEAD (SYSTEM ARCHITECTURE | MACHINE LEARNING | INFORMATION SECURITY) · PHD (COMPUTER SCIENCE) Switzerland (C Permit)

💌 vkulkarn@protonmail.com | 🐐 vaibhav90.github.io | 🛅 vaibhav-kulkarni-b94891166 | 🞓 Vaibhav KULKARNI

Executive Summary

Leveraging over a decade of experience in data engineering, machine learning, & core infrastructure, I am a hands-on engineering lead adept at aligning technical strategies with business priorities. Currently spearheading a portfolio of data-centric projects at Debiopharm International, transforming data accessibility & automating knowledge extraction to boost efficiency & innovation. Proven track record in building & leading engineering teams to deliver data-driven products from the ground up across supply chain, public transport, medical devices & healthcare sectors. With a strong academic foundation & practical industry experience, I excel in collaborating with internal stakeholders to gather business requirements & managing external collaborators to deliver projects with strict deadlines ensuring platform scalability & driving digital transformation.

Work Experience

Debiopharm International

Lausanne, Switzerland

Data Engineering Team Lead - responsible for the entire enterprise data infrastructure & data-platforms

July 2022 - Present

- Led a team to architect & deploy a data infrastructure, integrating large clinical datasets daily from over 200 entities into central-data-warehouse
- Engineered an entity-recognition & search platform by mining scientific publication databases Automated internal trend-monitoring functions
- Architected large-scale analytical applications & secure data solutions, enabling efficient workflows for clinical data science & biostatistics teams Productionised privacy-aware large language model-based applications to streamline document analysis and study protocol writing processes
- Supported compliance team via DevOps-based computerised system validation, infra qualification & security audits -Automated GxP workflows
- Responsible for technical due-diligence of healthcare-startups (technical-stack, software & ML strategy) to aid our VC funds investment decisions

SOPHIA Genetics Lausanne Switzerland

SENIOR DATA ENGINEER - RESPONSIBLE FOR NON-REGRESSION SYSTEM CRITICAL FOR NEW PRODUCT & FEATURE RELEASES

April 2021 - June 2022

- · Implemented terabyte-scale ETL pipelines to transform raw genomics data in-to analytics-ready format -Significantly lowering processing time
- Developed API endpoints & CLI tools to expose database functionalities to internal teams- Facilitated data democratisation and access control
- · Implemented regression testing mechanisms for variant detection bioinformatics pipelines & dashboards delivering real-time insights into KPIs
- · Authored formal TLA+ specifications for ETL operations, enabling quantification and benchmarking of logical correctness across the data stack

GenLots Lausanne, Switzerland

SOFTWARE ENGINEER | RESEARCH & DEVELOPMENT LEAD - RESPONSIBLE FOR ETL PIPELINES & DATABASE OPERATIONS

Sept. 2019 - Mar. 2021

- Developed a microservices architecture, streamlining ingestion, transformation, & delivery of client ERP data to production-grade ML services
- Deployed reinforcement learning-based solution, optimising end-to-end supply chain planning, warehouse management, and CO2 emissions
- Engineered a suite of tools for reporting & monitoring integrated into dashboards delivering real-time business performance metrics to clients
- Directed research projects in collaboration with Swiss watch manufacturing firms to predict inbound material needs & stabilise supply chains

Distributed Object Programming Lab

Lausanne, Switzerland

RESEARCH SCIENTIST

- Nov. 2015 Aug. 2019
- Partnered with public transport firms to architect & implement systems capturing high-frequency, real-time ridership data into a data warehouse Developed a Machine Learning-driven platform to proactively detect and reduce ticketless travel across the Lausanne public transport network
- Led platform development for a large-scale (>300 participants) spatiotemporal mobility-data collection project to facilitate ML-privacy research

ETH Zürich Zürich, Switzerland

PROJECT ENGINEER

Jan. 2015 - Aug. 2015

- Implemented a software-defined-radio-based platform for reliable IoT product testing, generating interference patterns of wireless appliances
- · Deployed the platform in production at ETH Zurich & TU Berlin with toolsets allowing for remote configuration & logging performance metrics

BOLT IoT India

EMBEDDED SYSTEMS ENGINEER

Aug. 2011 - Aug. 2013

- Designed PCB layouts for embedded platforms used in robotics & IoT systems & collaborated with software teams to ensure firmware integration
- Implemented toolsets & applications to benchmark platform performance, validation tests, EMI simulations & industry compliance certifications

Education

University of Lausanne

Lausanne, Switzerland

PHD, COMPUTER SCIENCE (THESIS: INFORMATION SYSTEMS FOR PRIVACY-AWARE MACHINE LEARNING)

Nov. 2015 - Aug. 2019

Technische Universiteit Eindhoven

Eindhoven, Netherlands Aug. 2014 - Aug. 2015

MS. EMBEDDED SYSTEMS (GRADUATED WITH CUM LAUDE)

Berlin, Germany

Technische Universität Berlin

Feb. 2013 - Aug. 2014

MS, Information & Communication Technology (graduated with honours)

Goa. India

Goa University

June 2008 - May 2012

BS, ELECTRONICS & TELECOMMUNICATION ENGINEERING (GRADUATED WITH HONOURS)

VAIBHAV KULKARNI · RESUME JUNE 5, 2024

Skills & Competencies.

- software & design: Python, Java, Scala and Rust. Skills: object-oriented-programming, test-driven development & software design patterns
- database management: PostgreSQL, MySQL, MongoDB, Cosmos DB, Redis. skills: data modeling, query optimisation, replication & migration
- data engineering: architecting ETL pipelines (Azure Data Factory, Azure Synapse Analytics, Data Build Tool (DBT), Apache Airflow, & Databricks)
- infrastructure & services: Docker, Kubernetes, Kafka, Azure and AWS. skills: containerisation, orchestration, on-prem monitoring with Zabbix
- machine learning & data science: NumPy, scikit-learn, TensorFlow, PyTorch. skills: data cleaning & quality patterns, DL-models and validation
- observability & monitoring: Elasticsearch-Kibana-Logstash, Prometheus, Grafana. skills: logging, traceability, alerting and anomaly detection
- devops & versioning: Azure DevOps, GitHub Actions, Terraform and Ansible. skills: release management, pipeline automation (CI/CD) and IaC
- data visualization: matplotlib, Tableau, Dash, Power BI, SAS visual analytics. skills: interactive dashboards, data wrangling and transformation
- security: Azure DevOps security, Darktrace and Firewall configuration. skills: security policies, application & infrastructure security procedures
- LLM (GPT)-based app development: OpenAl APIs, Vector Databases & Langchain. skills: fine-tuning & training techniques, prompt engineering
- project management: Atlassian Suite (JIRA, Confluence and Bitbucket). skills: agile methodologies, sprint planning and backlog prioritization
- languages: English (fluent), French (working proficiency, B2), German (elementary proficiency, A2), Hindi (Fluent), Marathi and Konkani (Native)

Publications, Open Source Projects, & Datasets

- Generative models for simulating mobility trajectories (collaboration with Statistics Department at Columbia University)
 V. KULKARNI, N. TAGASOVSKA, T. VATTER, B. GARBINATO (published at: Neural Information Processing Systems, Montreal, 2018)
 Impact: Advanced state-of-the-art results for synthetic data generation using ML (Ranked 1 Conference in AI)
- Breadcrumbs: A mobility dataset with point-of-interest annotations (collaboration with Information Security-Privacy Lab)

 A. MORO, V. KULKARNI, PA GHIRINGHELLI, B. CHAPUIS, K. HUGUENIN, B. GARBINATO (published at: SigSpatial, Chicago, 2019)

 Impact: Large-scale geospatial dataset to facilitate ML research (Ranked 1 Conference in Geo Information Systems)
- Controlled interference generation for wireless coexistence research (ETH Zurich Distributed Systems Research Group)

 A. HITHNAWI, V. KULKARNI, S. LI, H. SHAFAGH (published at: Implementation-Mobile Computing and Networking, Paris, 2015)

 Impact: open source project for a complete software-defined-radio platform for controllable interference generation
- Information Disclosure in Location-based services: An Extended Privacy Calculus Model (collaboration with BISA Lab)
 D. NAOUS, V. KULKARNI, C. LEGNER, B. GARBINATO (published at: International Conference on Information Systems, 2019)
 Impact: Integrate user information disclosure behaviours in Apps (Ranked 1 Conference in Information Systems)
- Privacy-Preserving Location-Based Services by using Intel Secure Guard Extensions V. KULKARNI, B. CHAPUIS, B. GARBINATO Open-source software project, (published at: International Conference on Embedded Networked Systems, Delft, 2017) Impact: Demonstrated the ability of hardware-based execution environments to deploy privacy-aware ML applications

Continuous Learning & Certifications

Data Engineering with Rust
Generative AI with Large Language Models
Data Engineering with Azure
Applied Machine Learning & Data Science
Amazon Web Services
Information Security & Privacy
Fundamentals of Machine Learning

Duke University, June 2024

DeepLearning.Al & AWS, July 2023

Udemy, Jan. 2023

University of Michigan, Apr 2021

AWS, May 2020

University College London, Jan 2019

Stanford University, Jan 2017

Talks, Grants & Awards

- Data Repository: Making Informed Technology Choices BioTechX Europe (Premier Healthcare Tech Conference)
- Expert Viewpoint on Al's Role in Data Space (Swiss Association of Actuaries)
- Generative AI Report for Healthcare (AI for Health)
- HEC-research grant for independent doctoral research by Swiss National Fund
- · Zeno Karl Schindler award for master thesis at ETH Zürich
- EIT-ICT Mobility award best business plan in IoT domain

Extracurricular Activities

- Launched a technology outreach initiative aimed at fostering a passion for science and technology among rural Indian students. Personally visited 25 schools, engaging over 400 students with hands-on demonstrations and presentations on real-world scientific applications
- Competed in multiple endurance races Lausanne Marathon ('18, '19), Kilomètre Vertical de Fully, & 20KM de Lausanne ('16-'24)
- Played for 'Flyhigh Lausanne' in Ultimate Frisbee (2018, 2019) and actively participated in Padel Tennis tournaments in Switzerland
